PROFILE

Detail-oriented B.Tech (AI & ML) student with strong academic record (CGPA 8.5) and hands-on knowledge in Python, SQL, C, and web technologies. NPTEL Elite certified in Human Computer Interaction (94%, IIIT Delhi). Certified in Full Stack and MERN Stack development. Passionate about building user-centric, scalable software solutions.

EDUCATION

Avanthi's Research & Technology Academy — B.Tech, CS (AI & ML) *Expected: March 2027*

Narayana Junior College, Srikakulam — XII (MPC) *March 2023*

Sri Gurunarayana Vidyaniketan, Srikakulam — X *March 2021*

TECHNICAL SKILLS

Languages: Python, C, SQL

Web Technologies: HTML, CSS, JavaScript

Databases: MySQL, MongoDB

Core CS: Data Structures, OOP, DBMS, HCI Principles, UX Design Fundamentals

Tools & Platforms: Git, VS Code

CERTIFICATIONS & ACHIEVEMENTS

Human Computer Interaction — NPTEL Elite, 94% | IIIT Delhi, MoE Govt. of India *Jan – Apr 2026*

Roll No: NPTEL26CS70S251302954 | Credits Recommended: 4 | Rank among 23,139 certified candidates nationwide

Java Full Stack Developer | AICTE & EduSkills *2025*

Full Stack & MERN Stack Development | Datapro *2024*

Python Programming | IBM Developer Skills Network & Skill India *2024*

Programming Fundamentals | Infosys Springboard *2024*

PROJECTS

Health & Hygiene Awareness Web Portal *Jan 2025 – Present*

- Built a community health web portal using HTML/CSS/JS applying Nielsen's heuristics for accessible UI serving 200+ community members.
- Designed a MySQL-backed survey module with Python to collect hygiene data from 50+ participants and generate weekly health-risk reports.

Student Record Management System *Aug – Nov 2024*

- Developed a Python CLI app with full CRUD operations on a normalized MySQL database (4 tables) handling 1,000+ student records.
- Implemented SQL aggregate queries to auto-calculate GPA and attendance, reducing reporting time by ~70% using OOP principles.

User-Friendly Chat Room *2025*

- Built a browser-based real-time chat application using HTML, CSS, and JavaScript with a clean, intuitive UI applying HCI design principles.
- Implemented features including message display, input handling, and responsive layout for smooth cross-device user experience.

AI-Powered Weather App *2025*

- Developed a weather application in Python integrated with AI tools to fetch and process real-time weather data with intelligent summaries.
- Leveraged AI capabilities to generate context-aware weather insights, enhancing user experience beyond standard weather data display.
